

The board game for playing cards
on a land of wooden shards

Video tutorial
& translations

GREETINGS

Hear ye, glorious messengers,

An auspicious quest is in order. The Order of Messenger Rabbits of the Citadel is ordering a race to procure royals to be ordained as the council of thirds. This is the highest order a rabbit of this order can get:

Visit the noble houses, acquire the cards of three royals, and bring them to the citadel, in that order:

Note that when I say "that order," I am not referring to another order of messenger rabbits, nor the order that drives this letter, but the order of the steps you must take, in order to restore order to the realm.

So, hoppity hop, in orderly fashion. Don't dawdle—no time to lose!

The White Herald

OVERVIEW

Go through the realm turn by turn, making stops on royal land. Win the game when you return with three royal cards in hand.

THE ACQUISITION requires ten points of a royal's suit—with every turn that transpires, you will be scoring more loot.

Make THE JOURNEY hex to hex—it's free if you stick to roads. Only pay to take the treks, or to ride horses and boats.

Stop when you reach a hex tile, and unless you're off the board, draw a new card from the pile—that's THE INCREMENT you scored.

ENDING THE GAME

Return to the **citadel** with three royal cards in hand. In this race you must excel to be the champ of the land.

Before the royal quest starts, choose a challenge for the mission; look for the circular marks that set the winning condition.

- **SIMPLE**: get three royal cards of any title (letter) or suit (symbol).
- **DIVERSE**: get three royal cards of any title, but with three different suits.
- **MONARCHIC**: get a K + a Q + a J of any suit.
- **DIVERSE + MONARCHIC**: get a K + a Q + a J of three different suits.
- **TRIBAL**: get three royals of the same suit.

SETUP

Up to four players

THE BOARD

To play a JACK RABBITS' match, you must first complete a board; build a wonderland from scratch—a new map to be explored.

The lands you connect and spread house the royals from each throne.

On your first game, go ahead, build the sample as is shown.

Or play normally instead: **BUILD A NEW BOARD** of your own.

BUILD A NEW BOARD

Place the "citadel" hex first. Leave aside the "underground". Pile and shuffle all the rest, even the small ones, face down.

Deal by tile shape, equal shares—there are twelve of every kind—as you hand each player theirs, the division will be fine.

To place them, first choose a style between a strict or free pace.

Strict: take turns placing one tile—the one you flip, you must place.

Free: no turns, it's all freestyle—flip all the tiles on their face.

These four tips will be worthwhile as guidelines in either case:

Don't make a dead-ending road (T), or join the roads from two hexes (X), and keep triangles' spread broad, instead of closely connected (!).

To start an island abroad, just place a hex disconnected; yet, the underground is odd, and will remain unconnected.

2

THE CARDS

Remove each face card and joker after placing the last tile.

Display them in any order—line up this court in an aisle.

Shuffle the rest as in poker—make a facedown drawing "pile", which holds "pip cards" of a number and "aces" of fancier style.

Each player will draw three cards to hold as the starting "hands": the resources each regards for THE JOURNEY through the lands, and for the royal rewards THE ACQUISITION demands.

3

THE TOKENS

Players will select their rabbits, place them on the **citadel**, and pick up their matching carrots—they get three of these as well.

Choose the royal quest you're on, described in **ENDING THE GAME**, and place on this hexagon the circle that marks this aim.

Now, select a starting player, and the order of the turns—the method for this endeavor resides beyond my concerns.

Flip this page and read the frame to start with an **INTRO GAME**.

After **SETUP**, use this frame to complete an **INTRO GAME**. Learn **THE PHASES'** rules and names, then advance to a **FULL GAME**.

THE PHASES of each turn

1. THE LOTTERY

Start your turns rolling two dice to have their digits unfold: you'll draw **one** card as a prize if you show **one** card you hold, proving that its number ties to **one** of the dice you rolled.

If you're ever holding ten, discard down to nine again.

Hold the outcome of the dice; transfers use it as **THE PRICE**.

2. THE JOURNEY

From the current hex you're on, you may choose a path to exit: move your rabbit as a pawn along the road you've selected, and land at a hexagon—wait a turn to cross the hexes.

You may move towards your goal, or choose not to move at all.

For more transportation modes, see **THE TRANSFERS** off the roads.

3. THE ACQUISITION

Your goal is to claim the card of the hex where you've set foot: if unclaimed, you may discard ten or more points of their suit, then place a carrot to mark, and finalize this pursuit.

There's no cost or consequences for visiting residences.

Keep the card claimed in your hands—get **THE INCREMENT** at once.

4. THE INCREMENT

End your turns on a hex tile (unless you go off the shore*): get a new card from the pile, and your turn will be done for; if you find no cards, repile—shuffle the spent lot once more.

If you're ever holding ten, discard down to nine again.

*Do not collect this reward, if you ever end **OFF-BOARD**.

THE PRICE

Transfer posts along the way charge the total on the dice. It's OK to overpay; you don't have to be precise. The suits allowed where you pay may be combined for the price. Show and leave out what you spend; it's "discarded" once you're done. You may spend royals as **10**, and the aces are worth **1**. If you spend a royal card, return it to the court's aisle; and you must remove your mark, take your carrot off their tile.

THE ROAD TILES

There are four of each of type »

THE TRANSFERS

It is free to make your rounds if you move along the paths; in the **mountains** (farther down), these go through the underpass. Other ways to get around are contingent on **THE PRICE**: use the suits marked on the ground and pay the sum of your dice.

TRANSFER VIA SHORTCUTS

The **mountains**, **rivers**, and **woods**, have two roads not far apart. You may switch between these two, trekking through the center part. To do this, pay with your suits—in this case, **clubs**, **spades**, or **hearts**.

TRANSFER VIA MERCHANTS

You may buy two types of rides on **crossings** where roads are forked: you'll gallop over the tiles to any hex on the board; or, row on the seas outside to find a road from this port. As soon as you pay the price, you must move to your next post. Since they're not by the seaside, landlocked merchants won't have boats.

TRANSFER VIA JOKERS

When you pass by any **tavern**, you may buy a joker card; you'll choose when to ride and travel, then release it afterward.

TRANSFER VIA RABBIT HOLES

Pay to travel **cave** to **cave**—use this trick to hop around. But if you would rather save, take your rabbit **underground**. In this case, the payment's waived—hop on out in the next round.

OFF-BOARD

You may want to leave the board—take a road that leads outbound. You'll end your turn overboard, with no **INCREMENT**—you've drowned. But then, once you've rolled off-board, you'll enter the **underground**! Get your **INCREMENT** restored, while you wait another round.

For a **FULL GAME** you'll include **THE STRATEGIES** of each suit. This frame should be introduced once the **INTRO**'s understood.

CLOVERS (Clubs)

FLY AMONG KING TOWERS

Show one card before you roll; if it beats the dice or ties, pick a tower as a goal for **THE JOURNEY** through the skies. Otherwise, you'll fall **off-board**, yet keep your card anyway. And **THE LOTTERY** still holds: you may match and claim the prize.

If you pay to meet the dice, you'll still fly and won't fall off. The price needed to suffice is the "shortfall" (what you're off).

Suits from the departing tower must be used to pay what's owed. The clubs' tower grants more power: you may spend the card you showed.

SPADES (Swords)

FIGHT WITH THE RABBITS

You may steal a random card and send a player **off-board**, if you're playing where they are and challenge them with a sword. You attack, and they defend, adding spades you can afford. And the weakest, in the end, will be sent out of the board.

A count draw is strictly barred; discard your spades when you're done. There will be no stolen card if the defender has won.

When you steal a royal card, discard one if it's your fourth; go to **THE INCREMENT** part, and swap carrots in accord.

HEARTS (Cups)

ACCESS THE QUEEN PALACES

As you enter a queen's hex, any player may demand: that if you do not possess the queen's card that marks the land, you show six points to the rest, adding heart cards from your hand. Those who ask to see your hearts, must first show cards of their own, which, even from far apart, prove their access to this zone. If you fail to show your cards, go **off-board**—your cover's blown. But succeed, and they'll depart—**off**, and lose the cards they've shown.

Any players off the board may not nag those at the door.

DIAMONDS (Gold)

TRADE AT JACK PLAZAS & WITH THE RABBITS

All spent cards are being sold; each jack's hex sells its own suit. Check what these posts have in store—when you play there, grab some loot. What you take, replace with gold as the signs instruct you to—the star symbol on the board means that any suit will do. When the pile needs to reload, these markets run out of goods.

Players you meet on the board may possess cards that you covet; you may buy or sell for gold, without showing what is offered. Swindlers will get thrown **off-board** if a short change is uncovered.

OPTIONAL RULES:

AMBIVALENT ACES

You may decide on their value whenever using an ace: **I** or **II**—what have you—even in the marketplace.

CAPITAL ACES

Your first "**Ace**" is worth **II**—the others you spend are **Is**. As a record that it's spent then, keep it in front of your hands.

ADDITIONAL CAPITAL ACES

Get an additional tip after spending your first **Ace**; it counts as one extra pip when needed at any place.

ADVANCED CITADEL

Hearts: as in palaces' access.
Diamonds: to buy any loot.
Clubs: for tower flying passes—shortfall's paid in any suit.

WINDFALL OF PRIZES

You may win more than one prize, **THE LOTTERY** has no limits—whether cards that match the dice, or a roll of double digits.

TIGHT SUITS

Have as many suits as players, and **one of each road tiles** too; for instance, with three contenders, remove a set and a suit.

PATRIARCHAL VALUES

Have unequal value levels—if you don't think that is whack—from **14** down to **II**, for the **Ace**, **King**, **Queen** & **Jack**.

SHORT HANDS

You must be a wiser spender on the quest that you pursue; your hand of cards will be slender, up to six to hold on to.

TRAIL OF CARROTS

THE JOURNEY may be prolonged if your carrot's on a hex; you may visit and go on to the place you're headed next.
